DIGITAL PRODUCT PASSPORT  
ISO 14067:2018

what3lo DPP

## 3 g CO<sub>2</sub>e

TOTAL PRODUCT CFP

per part

## 4,33 g CO<sub>2</sub>e/kWh

EMISSION FACTOR

### PRODUCT IDENTIFIER

PART0010

Scarf holder Onyx

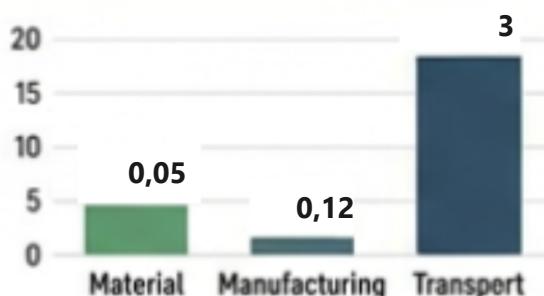

Lostboylab AB  
Rättarevägen 4, Vellinge,  
SWEDEN

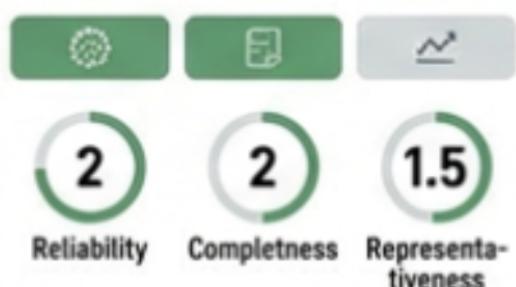

### SCOPE & BOUNDARY

### RESULTS BREAKDOWN

### DATA QUALITY

## ISO 14067:2018 COMPLIANCE DETAILS

### 1. GOAL & SCOPE DEFINITION

**Goal:** Cradle-to-gate CO<sub>2</sub>e calculation for Digital Product Passport (DPP).

**Functional Unit:** One (1) Scarf holder Onyx Leather black

**System Boundary:** Material Extraction -> Manufacturing -> Transport (Cradle-to-Gate).

### 2. DATA QUALITY ASSESSMENT

	ISO Parameter	Score (1-5)	Description
	Technological Representativeness	5	Primary data, specific processes.
	Geographical Representativeness	4	Sweden, EU average data.
	Temporal Representativeness	5	Current year (2025) data.
	Completeness	5	All significant inputs covered.
	Reliability	5	Measured data, verified factors.

### METHODOLOGY & STANDARDS

Aligned with ISO 14067:2018, GHG Protocol Product Life Cycle Accounting and Reporting Standard. GWP 100-year factors from IPCC AR6.

### EMISSION FACTORS SOURCES

Ecoinvent v3.8, Vattenfall EPD 2024, rPETG matte DEFRA 2024.

### UNCERTAINTY & LIMITATIONS

**Uncertainty:** ±5% on total CO<sub>2</sub>e due to transport and energy grid variability.

**Limitations:** Excludes product use phase and end-of-life.

### VERIFICATION STATUS

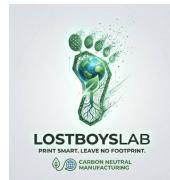

**Internal Review:** Completed by Lostboylab DPP team.

**Third-Party Verification:** Pending.
